

## Task 2.1: Navigating Directories

A screenshot of a Windows Command Prompt window. The title bar reads "C:\ Command Prompt". The window content shows the following text: "Microsoft Windows [Version 10.0.22631.4037] (c) Microsoft Corporation. All rights reserved. C:\Users\Naheel Siddiqui> cd Desktop C:\Users\Naheel Siddiqui\Desktop> mkdir LabTasks C:\Users\Naheel Siddiqui\Desktop> cd LabTasks C:\Users\Naheel Siddiqui\Desktop\LabTasks> cd C:\Users\Naheel Siddiqui\Desktop\LabTasks C:\Users\Naheel Siddiqui\Desktop\LabTasks>".

```
C:\ Command Prompt
Microsoft Windows [Version 10.0.22631.4037]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Naheel Siddiqui> cd Desktop

C:\Users\Naheel Siddiqui\Desktop> mkdir LabTasks

C:\Users\Naheel Siddiqui\Desktop> cd LabTasks

C:\Users\Naheel Siddiqui\Desktop\LabTasks> cd
C:\Users\Naheel Siddiqui\Desktop\LabTasks>

C:\Users\Naheel Siddiqui\Desktop\LabTasks>
```

### Commands Used:

1. cd (Change directory: Navigate into a directory / Check directory)
2. mkdir: Create directory/subdirectory

### Questions:

1. What command did you use to check your current directory?  
Answer: cd
2. How can you go back to the previous directory?  
Answer: By using the command "cd .."

### Task Completion Report:

1. First I navigated to Desktop using the command "cd Desktop"
2. Then I created a new directory named LabTasks using the command "mkdir LabTasks", and navigated into this directory using the command "cd LabTasks"
3. I carried out the command "cd" to confirm my location in LabTasks subdirectory
4. I did not encounter any significant problems during the task
